

FixFirm

First for service, second to none

Composite Fire Extinguisher Range

Completely PFAS-free, with no requirement for annual servicing for up to 10 years

The P50 range

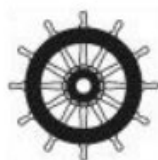

The P50 range of fire extinguishers are designed and manufactured in the UK and offer an environmentally friendly, corrosion-resistant and lightweight alternative to traditional metal extinguishers.

They are manufactured with the most modern, strong, and lightweight materials including:

- **UV protected HDPE inner and outer cylinders**
- **Stainless steel, brass nickel-plated head caps and neck rings**
- **Aramid Fibre (Kevlar)**
- **Multi-purpose PFAS-free chemicals**

Certified safety

The P50 range is tested and approved to the highest industry standards and certification.

Product spec

Product Code	Type	Capacity	Fire Class	Temperature Range	Weight (kg)	Fire Ratings
Z091-820	Water Mist	2ltr	A, F & Electrical	+5° to + 60°C	2.7	8A, 5F
Z091-860	Water Mist	6ltr	A & Electrical	+5° to + 60°C	8.25	13A
Z091-060	Foam	6ltr	A, B, F & Electrical	+5° to + 60°C	8.5	27A, 144B, 25F
Z091-090	Foam	9ltr	A, B & Electrical	+5° to + 60°C	11.7	43A, 183B
Z091-920	Powder	2kg	A, B, C & Electrical	-20° to + 60°C	2.74	13A, 55B
Z091-960	Powder	6kg	A, B, C & Electrical	-20° to + 60°C	8.5	43A, 233B
Z091-990	Powder	9kg	A, B, C & Electrical	-20° to + 60°C	11.7	55A, 233B

An end to costly maintenance

P50s do not require costly annual servicing by a third-party engineer.

They simply need a visual check by a competent member of staff. Training and helpful 'how to' videos are available.

Why choose the P50 Extinguishers?

Compliant with
UK fire safety
standards

Composite
construction for
durability

Eliminate
annual
servicing costs

100% PFAS-
free and eco-
friendly

A sustainable solution

P50 extinguishers are an environmentally friendly, sustainable alternative to traditional steel fire extinguishers.

20 year
life span

Reduced carbon
footprint

Low energy
production

Can be
Refilled

Fully
Recyclable

PFAS-free

P50s are free from harmful PFAS chemicals, which are typically found in traditional foam extinguishers. These **'forever chemicals'** don't break down in the environment and are toxic.

Many companies and organisations are planning ahead and choosing P50-ECO extinguishers to help reduce their environmental impact.

Contact our team for advice on the best solution for your site and to order.

We're always looking for innovative solutions to reduce our carbon footprint. The P50 ticks all the boxes thanks to its low-carbon, low-waste manufacturing process and servicing requirements. It's also longlasting, non-toxic and recyclable. The switch to P50 means we're ahead of the game and ready for the impending PFAS ban.

Billy Cunningham, Director of Fire Safety at Landsec

Following advice regarding the upcoming ban on PFAS 'forever chemicals', we decided to act early. Instead of refurbishing our existing extinguishers, we upgraded to the PFAS-free P50-ECO range.

Stuart Lishman, Facilities Manager at NATS

The P50 is a single point extinguisher, and the user doesn't have to make decisions based on the type and colour coding of extinguishers. This also means we needed fewer extinguishers. The potential for savings was great. The P50 doesn't have to be serviced or replaced for 10 years. It fits perfectly with the university's green policy because it is recyclable.

Nick Greenwood, University of Brighton

Eliminating the process of external servicing was the driving force behind the decision to swap metal extinguishers for the P50, on average we are installing half the number of P50 extinguishers compared to the old metal ones in our sites.

Malcolm Shevlin, Pure Gym

The P50 is a single point extinguisher covering both A & B type fires. This eliminates the need for a human decision and ensures only the correct extinguisher can be selected; the P50.

Adam Watson, Heathrow Airport

First for service, second to none
